Creative Saline Water Lamp

Saline Water Lamp produces electric power by consuming aluminum and salt water. The electric power can be recharged by changing new aluminum sheets and salt water when the electric power is used up. It is easy and fast to recharge. It also Charges Mobile Devices. **This Lamp is Good in Areas that have been affected by Natural Disasters Such is Hurricanes, Storms, Earth Quakes, Camping etc.** *It works during Summer and Winter because NO NEED OF ELECTRICITY AND DOES NOT NEED THE SUN TO BE CHARGED. IT ONLY NEEDS WATER AND SALT. You can also see how it works by watching the video on our website.*
